Extracted from page:

```
{'text': "Samsung Electronics' stock has reached a new 52-week low due to a continuous sell-off. This decline in stock value is part of a broader trend affecting the company, as investors are increasingly selling off their shares. The article suggests that this trend is influenced by various market factors, although specific reasons for the sell-off are not detailed in the provided content. The outlook for Samsung Electronics' stock remains uncertain as the market continues to react to these conditions.", 'metadata': {'source': 'Businesskorea'}}
```

Step 3: Here's a summary of the analysis:

Samsung Electronics' stock has hit a new 52-week low due to a continuous sell-off. This decline is part of a broader trend, with investors selling off shares. The specific reasons for this trend aren't detailed, but the outlook remains uncertain as the market reacts to these conditions.
